Specialist Training for the Oil, Gas, Petrochemical and other Hazardous Industries

Falck Fire and Safety combines the unique expertise and worldwide operational experience of Resource Protection International with that of Falck Risc in industrial emergency response training.

This complementary partnership offers services for all aspects of Fire Hazard Management from assessment of needs to implementation of policies and training at world class fire training facilities.

Our expert fire and safety instructors deliver specialist academic knowledge uniquely combined with practical incident experience gained from working in the Oil, Gas and Petrochemical industry worldwide, with emphasis on refineries and storage terminals.

Our unique workshops can also be tailored to suit specific customer needs. These can be presented at a client’s own facility or at a training institute in Falck’s worldwide network.
Emergency Planning for Major Accident Hazards Workshop

‘Covers the practical aspect of emergency planning and its implementation in high risk industries’

WORKSHOP OBJECTIVE

This Workshop aims to provide delegates with an in-depth knowledge of all aspects of risk identification, development of plans, emergency management process and the undertaking of instructive training.

Emphasis is also placed on the practical aspect of emergency planning and its implementation in high risk industries. Topics include identification of Major Accident Hazards scenarios and analysis, Emergency Response plan design and layout and interactive exercises such as planning and managing a Major Event Exercise.

The programme has been developed from the worldwide experience of Resource Protection International (RPI) and will ensure that delegates are updated in the latest developments in this important field.

WHO SHOULD ATTEND?

This workshop is directly relevant to personnel responsible for any aspect of Fire Hazard Management at refineries, terminals, gas storage, and petrochemical facilities.

- Those involved in COMAH or other high risk process/complex storage sites
- Emergency planning, site safety managers and safety practitioners
- Fire Brigade Management / Emergency Responders
- Fire Systems personnel / end users
- System Design Engineers
- Fire Protection Engineers
- Safety Professionals
- Loss Prevention Engineers
- Health, Safety and Environmental Protection Agencies

WORKSHOP LECTURER

Our expert fire and safety instructors deliver specialist academic knowledge uniquely combined with practical experience gained from working in the field in the Oil, Gas, Petrochemical and other hazardous industries worldwide.

As active Fire Hazard Management Consultants with RPI they share with delegates their invaluable experience of different operating environments and latest industry best practice.

This workshop will be delivered by one lecturer selected from RPI’s team of specialists which includes:

Paul Watkins

Paul is a graduate of Fire Science and has developed and delivered training on a wide range of fire engineering and Risk Analysis topics worldwide. He is also responsible for carrying out fire modelling and Quantitative Risk Assessments (QRA) and specialises in Emergency Planning and Systems Engineering.

Dr. Niall Ramsden

Niall combines worldwide practical experience with academic knowledge in the field of specialist Fire Hazard Management in the oil, gas and petrochemical sectors with particular emphasis on refineries and storage terminals. As Director of RPI Niall has been responsible for developing and implementing much of current industry guidance and standards.

Simon Neale

Simon is a fire protection engineer with over thirty years’ experience of a wide variety of equipment including gas analysis and detection. Simon has developed training courses and delivered seminars on all aspects of fire and gas detection and fire protection worldwide.
Emergency Planning for Major Accident Hazards Workshop

Specialist training for continued Professional Development

WORKSHOP DATES
Abu Dhabi, United Arab Emirates:
23rd - 25th September 2014

WORKSHOP HOURS
Awarded 20 CPD hours by the Institution of Fire Engineers
DAY 1: 8:00 am to 4:30 pm
DAY 2: 8:00 am to 4:30 pm
DAY 3: 8:00 am to 3:00 pm

PROGRAMME TOPICS

Day 1
• Identification of Scenarios / Major Accident Hazards
• Legislative requirements & Safety Case Development
• Incident scenario types, effects and consequences
• Scenario Worksheets and Analysis
• Fire and Explosion Modelling

Day 2
• On-site off-site responsibilities
• Management Team structure, roles and responsibilities
• ERP format, design and layout
• Emergency Management Structure

Day 3
• Exercise design / management – Planning a Major Exercise
• Design of Aims and Objectives
• Scenario development and limitations
• Who to involve
• Effective debrief and capturing of lessons learned
• External agencies interface
• Practical Exercise Planning

All workshops are delivered in English.

See attached booking form for venue details and workshop fees

All classroom exercises and discussions will be supported and complemented by case histories, video and slide presentations.

Course notes will provide a comprehensive reference source of great value to all delegates on return to their job location.
